

Year 7

School Vision	Challenging all our students supportively to become confident and curious enhancing lives now and in the future					
Faculty Intent	Understanding the past, exploring the present and making global citizens of the future					
Subject Intent	<i>Creating Global Citizens of the Future</i>					
EARTH SYSTEMS	Term 1		Term 2		Term 3	
	1	2	3	4	5	6
Topic Name	<u>Topical Human Geog- What is going on in the news?</u>	<u>How to be a Geographer</u>	<u>Earth's Natural Resources</u>	<u>Hydrology</u>	<u>The Worlds Ecosystems</u>	<u>Africa</u>
Key Content	-Skills & Maps	-Skills & Maps	-Minerals, Rocks & Soil -Local Fieldwork	-River Landscapes -UK Case study -Local Fieldwork	-Food chains -Tropical Rainforests	- Link topics studied in year 7 - Continent Study
Intent						
How does this link to your intent?	This unit is based on global news relevant to our time and context – linking to sustainability and making decisions on the future of our planet.		Using the planet as a resource looking at how elements interact and the finite nature of non-renewables.	Water as a global resource needs to be understood from hydrosphere scale to drainage basin to allow students to understand how rivers and their management are important to people.	Students learn about global biomes and the tropical rainforest case study to demonstrate interdependence locally and globally.	Seeing how location and development impact interdependence of human and physical systems studied in the previous units.
Sequencing						
Why this and why now?	This unit ensures interest and engagement on current topic each year. Includes skills that interleave throughout KS3 as well as Human and Physical geography elements extend ned later in		Learning about 'spheres' that underpin al Geography and directly support	Based on climate in Cyprus this is the appropriate time to visit rivers. It also builds on skills and	Builds on previous unit and sets foundations for extreme	This unit will return to all skills from units 1-5 and content from units

	key stage 3. With a Paper 3 style exam to allow synopticity and baselining. Explicit introduction of subject intent 'global citizen'		biosphere and hydrosphere following units.	concepts from units. Gives building blocks of required key concepts in Physical Geography.	environments in Y8 & 9 units.	-5 in the context of Africa. Congo
National Curriculum Audit						
Locational Knowledge	Varies based on selected topic annually		TBC	TBC	Amazon and Malaysia	African Continent
Place Knowledge	Varies based on selected topic annually		TBC	TBC	Amazon and Malaysia	African Continent

Homework						
Description	A creative project to represent both sides of the argument for this topic.	Skills Booklet	Research Project	Research Project on a famous river	Research Project	Work on unit UN presentation / debate
Assessment						
Type	DME	Skills end of unit test	DME	River's end of unit test	Exam & Field study write up: presentation of data, analysis & conclusion	Model UN debate End of year assessment

Why this style of assessment and why now?	Exam style questions to baseline students' knowledge and skills as well as extended writing and decision making.	Cumulative multiple choice on previous unit (AfL not summative) then summative on this unit. Allows students to demonstrate recall and how fieldwork is assessed.	Cumulative multiple choice on previous 2 units (AfL not summative) then summative essay on this unit. Builds skills for synoptic end of year assessment.	Cumulative multiple choice on previous 3 units (AfL not summative) then summative exam on this unit and fieldwork skills. To test recall of key concepts and develop fieldwork analysis skills.	Synoptic and strong links to intent and allows for spiral of all Y7 content so far.
---	--	---	--	---	---

Year 8

School Vision	Challenging all our students supportively to become confident and curious enhancing lives now and in the future					
Faculty Intent	Understanding the past, exploring the present and making global citizens of the future					
Subject Intent	<i>Creating Global Citizens of the Future</i>					
HUMAN INTERACTIONBS WITH EARTH SYTEMS	Term 1		Term 2		Term 3	
	1	2	3	4	5	6
Topic Name	<u>Natural Hazards</u> -Geological Timescales	<u>Population</u> -globally -population pyramids	<u>Coastal Landscapes</u> -Weathering -Coasts	<u>Asia</u> -India -China	<u>Extreme Environments</u> - Polar -Glaciation	<u>Climate Change and Earth's Future</u> -What is climate change?
Key Content	-Plate tectonics					

	-Volcano case study -Earthquake case study Japan 2011	-urbanisation -migration	-UK Case study -Local Fieldwork		- Russia Case Study	-Causes -Impacts
Intent						
How does this link to your intent?	Looking at structure of Earth and how hazards shape life and look at global human responses.	How growth and movement of global populations impacts the sustainable use of earth's resources and migration patterns.	Coasts are global features and settlements have developed on coasts. Understanding coasts allows students to consider management of coasts and future sea level rise.	Introduce key concepts of climate (higher order taught in Y9) revisiting biomes, Rivers and Population through case studies from the region.	Development of rivers Y7 and coasts Y8 in the context of the cryosphere and building on last units use of case study. Builds into Y9 unit on Middle East.	Seeing how location and development impact interdependence of human and physical systems studied in the previous units. Sundarban / Andaban / Nicobar islands (Maldives etc?)
Sequencing						
Why this and why now?	Good hook for start of the year and as military school with high mobility it is an opportunity to motivate and assess their geographical skill level.	Human geography concepts explored not students can access in greater depth and begin to apply to previous units and prepare for Asia and Climate Change unit.	Based on climate in Cyprus this is the appropriate time to visit coasts. It also builds on skills and concepts from Y7&8 units. Returns to building blocks of required key concepts in Physical	All units skills and knowledge from Y7 to now can be applied to the Asian continent.	They have developed key concepts from rivers and coasts to support this (as the highest order landscape unit) and how humans interact with the physical landscape. Also leads into final unit.	This unit will return to all skills from units 1-5 and content from units -5 in the context of Asia. Island communities

			Geography. As well as UK and Cyprus being islands.

Why this and why now?	Students will gain a broad understanding of place and space at different levels. They will begin to develop their understanding of the physical processes that shape our planet. They will also begin to discover the interactions between people and the planet and the impacts these have.	Students will gain a broad understanding of place and space at different levels. They will begin to develop their understanding of the physical processes that shape our planet. They will also begin to discover the interactions between people and the planet and the impacts these have.	Students will now begin to develop their understanding of where the earth's population is located and why. They will build on knowledge from the previous unit to explain further how people interact with the land and the processes that shape it.	Students will now begin to develop their understanding of where the earth's population is located and why. They will build on knowledge from the previous unit to explain further how people interact with the land and the processes that shape it. Students will carry out their first fieldwork during this half term as they now have a good basis knowledge on urban environments. The weather in Cyprus during this time is ideal for outdoor work as it is not too hot/cold/wet/dry.	Students will return to a physical topic and build on their knowledge of how the earth works and the processes that shape it. We will discover in greater details the impacts humans are having on the earth. Students will carry out their second field study during this half term, they are located on the coast and will utilise their local environment. The weather in Cyprus during this time is ideal for outdoor work as it is not too hot, as we head into the summer term.	Following on from the previous topic students will build on their knowledge of processes that shape the earth. They will develop their key geographical skills further during this unit, in preparation for year 11 topics. Students will sit end of year exams covering all 5 topics they completed. This means they will be able to sit past papers from all three papers.
